## Bring smart home technology into the garage

Many garage door openers are now equipped with Wi-Fi so you can open and close your door with a few taps on your smartphone. You can simply download an app while your new opener is being installed and rest easy knowing the status of your door 24/7 from anywhere in the world. With real-time alerts delivered through the app, you can secure your home even if someone else in the household isn't so diligent. The app can open or close the garage door from anywhere, so you never have to worry about leaving your home, family, or possessions vulnerable.

For the ultimate peace of mind, in-garage cameras can also be installed so you can always be sure of what's going on in the garage – from the other side of your house or the other side of the world. You can check in on kids playing, contractors working, or even investigate that odd noise without ever setting foot in the garage.

The innovation doesn't stop there. There are ways to have packages delivered right into your garage and to have door data sent to your garage door technician if there's ever a problem. The possibilities for a smart garage are truly endless!
